

Coby Cho

Houston, TX | cobycho7@gmail.com | 713-918-9957 | <https://cobycho.github.io>

Computer Science graduate and five-time Microsoft Certified professional with Azure Fundamentals and Azure AI Fundamentals certifications, bringing a strong foundation in cloud concepts, security, and modern data-driven systems. Proven ability to collaborate across teams, communicate clearly with stakeholders, and drive measurable process improvements in fast-paced, client-focused environments.

Education

University of Houston (8/17/2020 – 12/15/2024) - Bachelor of Natural Science in Computer Science | Dean's List Fall 2022

Relevant coursework: Software Development Practices, Operating Systems, Algorithms and Data Structures

Experience

Sterling Infrastructure

3/01/26-Present

- Developed Power BI, SQL, and Dataverse-based reporting solutions to improve visibility into employee performance and process bottlenecks.
- Improved operational efficiency by automating review, notification, and reporting workflows, reducing administrative effort by 20%.
- Resolved business application and data integration issues across enterprise systems, improving data accuracy and reducing process delays.

Plunkett Research Ltd. – Business/Data Analyst Intern

6/1/22-10/15/22

Designed and maintained SQL-based data integrations and reporting workflows to support enterprise analytics systems.

- Analyzed business and technical requirements and translated them into structured models and system configurations.
- Implemented optimizations that improved system performance and data processing efficiency by 20%.

Projects

Career Companion

10/20/25 – 11/17/25

- Built and deployed Career Companion, a full-stack web app that analyzes user needs and translates them into functional workflows for tracking job applications, statuses, and follow-up tasks
- Designed a structured relational data model to support accurate reporting and improve user productivity

Skills

Business Analysis Skills: Requirements Gathering, Workflow Mapping, KPI Reporting, Data Validation, Process Mapping, Agile/Scrum

- **Technical Skills:** Data Modeling, Data Cleaning, Power Query, C++, Agile Methodologies
- **Tools & Platforms:** SQL, Power BI, Microsoft Excel, Python, SQL Server, Power Automate, Microsoft 365, ServiceNow, Microsoft Office, Salesforce
- **Certifications:** Microsoft Certified: Power BI Data Analyst Associate, Azure Fundamentals, Azure AI Fundamentals, Security, Compliance, and Identity Fundamentals, Power Platform Fundamentals
